

RADIATORS - Fitments For Most Classics

High Efficiency Replacement Radiators

Vintage Air offers a new direct replacement radiator for your street rod. For cars with more than 400 cubic inches we recommend using only high performance type radiators such as Walker Z-Line the equivalent.

Vintage Air Radiator Shrouds

For optimum performance and efficiency from your air conditioning system we strongly recommend using one of our heavy duty fan shrouds. These shrouds are made from durable injection molded ABS material with trimmable flanges for custom fitment.

**NOTE: Please allow 4-5 weeks for all radiator deliveries.
No returns on custom radiators or special orders.**

For later model radiators see Sure Fit application pages for your make and model.

INDUSTRY RECOGNITION

In 1993 we received another Best New Product Award from the National Street Rod Association for our automatic temperature control panel. No matter how many times Vintage Air products are selected for this award we are still thrilled and proud to be a part of this great hobby. The challenge remains to improve and expand our products and services to better serve you, our customer.
