

THE EASIEST WAY TO FIT YOUR EVAPORATOR UNIT INTO PLACE. These mock-ups are representative cases with jack-nuts and brackets for each system but without the internal components so they are extremely light weight - helpful while holding the unit in place to determine fitment, mounting and hose routing.

Ask your dealer about a loaner Mock-Up Unit or order one of the low priced units for yourself.

Gen-II Mini 660050-VUA

Gen-II Compac 680000-VUA

Gen-II Super 610050-VUA

Gen-IV Magnum 671450

680051-VUA - Set of all three Gen-II mock-up units.

680052 - Set of three Gen-II mock-up units plus the Gen-IV Magnum mock up unit.

FACTORY TOUR

During one of our recent dealer training sessions Rick Love explained some of the technical details of our Gen II systems. Dealers who attend our annual meetings learn about every phase of installing a high performance air conditioning system from the guys that actually make them.
